

## Prepotency

- **Potentate – a sovereign with great authority and power.**
- **Potential – latent power, unborn, waiting to be developed.**
- **Potent – having authority, control, and dominion. Also, having effective procreation, the power of procreation.**
  - Pre – priority, before in time and place, in front of.

Our Master is prepotent (greater in authority and power), and His offspring are also prepotent, since we inherit all of His (spiritual) genes because we received Him (Jn 13:20; Lk 10:16; Mt 10:41; Jn 7:17-18; Rom 10:14). Someone who is prepotent is marked by the capacity to transmit the same character to his or her offspring (Isa 53:10-11). As He is, so also are His offspring in the world. He is characterized by prepotency (1 Jn 4:17 and His offspring are by Exo 20:4-6; Pr 22:5; Gen 18:19; Gal 3:16,27,29). Genes can be strengthened or even generated by a predominant Father or Teacher (Jn 3:3-5; Lk 6:40; Jn 14:26; Pr 22:6; 2 Cor 3:18).

1 Jn 4:15-17; 3:3. Isa 53:10 — He did what He came to accomplish, as Isa 53:11 says. His offspring is His joy and satisfaction. They are the joy set before Him (Heb 12:1).

One having prepotency has the predominance to reproduce, to produce offspring in his own likeness or desire. Most people have these little humans but without the character to produce even the same likeness, but rather inferior to even their inferior character (Pr 13:24; 20:30). And they produce a government and President after their own likeness. Also, as to their children, the saying is true, “like father like son.” Ex 20:5-6 describes those who love Him and those who hate Him.

Prepotency is the ability of one individual to transmit its character to its offspring to a greater extent than the other parent has. One is able to do this because of an accumulation of *homozygous* (one kind) dominant genes. One parent can overcompensate for the weaker one by his predominance and put into his offspring more homozygous dominant genes (or by strengthening the weak genes).

Prepotent is to be more powerful. It is to have exceptional power, authority, or influence. It is to be pre-eminent, exceeding others in power, superior, exhibiting genetic prepotency over other responses and tendencies. It is also attained by maturational primacy, recentness of emission or evocation, repetition with positive reinforcement or greater motivational charge.

Response is that with the greatest immediately effective habit or strength. By grace disciples can utilize all of their own gifts to accomplish His will (Isa 53:10). This is what His offspring can do.

Jn 5:42 – We can know the same way as our Master. Jn 5:43 is the way the anti-Messiah will come into the Jews in the last days (Jn 5:43-47). Jn 5:43 is “another Jesus” as 2 Cor 11:3-4 say. The man of sin will be prepotent in his own desire for glory. Satan can use such a person to his own gain as he did Billy Graham and the popes (2 Cor 11:13-15).

*Homozygous* means producing the same kind of positive genes, which makes offspring strong (dominant) over another offspring who inherited heterozygous (opposite) genes. The greater potential is toward weakness when heterozygous genes are present. Hetero is inheriting both dominant and recessive traits in the weak genes instead of the same in the positive genes.
